

Like this template in your own  
teaching sessions so your students  
can unleash their imagination and  
start shaping concepts even if you're  
not sitting in the same room.

- ☐ 0-10 minutes to prepare  
☐ 10-15 minutes to prepare  
☐ 1-4 people (approximate)

**Word count**  
English word: 1  
Chinese word: 1  
Total word: 2

Another lot of preparation goes a long way with this project. Here's what you need to do to get going:

- Team gathering**  
Send a letter to each participant if the meeting is mandatory (ask if you don't want to attend or prefer to attend).
- Set the goal**  
First, share the problem and then focus on getting to the bottom of the problem.
- Establish the team's membership**  
Put the participants' backgrounds in front of them and get to know them.

What problem are you facing in school? What are your problems at home? Write about them. This will be the first of your assignments.

- Pembahasan**

Types being played  
with by modern teams  
includes those who do  
not play at all.

It is important to note that the results of this study are based on a cross-sectional design. Therefore, the causal relationship between the variables cannot be established. Future research should use a longitudinal design to investigate the relationship between the variables over time.

The only legend that needs to be added is shared with members of your target list. It's helpful.
